

## MR. GYROS ★★★★★

8234 Metcalf Ave, Shawnee Mission, KS 66204

When viewed from the outside, Mr. Gyros is odd-looking and seems as if randomly placed on a street corner. Huge white pillars were the building blocks for the restaurant. The inside, though, was the opposite. The restaurant was refined and pleasant. It was beautiful, but a little intimidating. The chairs and tables were perfectly lined up on the carpet and the place had barely any wall because there are so many windows. There weren't many decorations adorning

the wall, yet the few that were there were gorgeous. Orange and brown vases lined the walls and huge candleholders were attached to a branch canopy. The restaurant is refined, and the atmosphere is pleasant.

When it came to deciding what to order, the menu was simple; It showed pictures of what the food looked like. The staff was also very nice and helpful when we asked for suggestions. The food was prepared within a few minutes. The Gyro

Salad I ordered was intimidating at first, because I had never had anything like it: a typical green salad, topped with cucumbers, peppers, olives, carrots, onions and goat cheese. The cucumber dressing and goat cheese gave the salad its unique Greek flavor.

The food was unexpectedly good, and even for a person who prefers routine food. For a good deal, Mr. Gyro's gives Kansas City a little bit of Greek pizaz with every bite.

**Gyro with Beef Review:** The gyro was very tasty but not be enough food for dinner. It had a little spice but not too much and tasted senstional with the cucumber sauce; the gyro had beef, onion and thin tomato slices on pita bread.

**Kifta Kabob Review:** The kifta kabob was basically a gyro with different spices on the meat and no cucumber sauce. The beef had a lot more spice to it and was a little bit cheaper. ■ Maddie Niemackl

## the accidental billionaires

The story of Facebook is the story of the good idea that grew into a global phenomenon. It is the story of founders Mark Zuckerberg and Eduardo Saverin, their friendship, betrayal and incredible wealth.

Written by Ben Mezrich, "The Accidental Billionaires" is about the creation of Facebook, from the beginnings in a Harvard dorm room to the multi-billion dollar corporation it is today.

During his sophomore year at Harvard, Zuckerberg had a brilliant idea: a social networking website to connect the users with people they already interacted with.

It was a huge success. In the first four days the site was running, more than 900 people signed up.

But as Facebook grew, connecting more people than ever, it pulled Zuckerberg and Saverin apart. After his sophomore year at Harvard, Zuckerberg dropped out of school and moved to Palo Alto, Calif. to continue working on the technical side of Facebook. Saverin stayed on the East Coast to

graduate from Harvard and work on the business side of the operation. But with Zuckerberg and Saverin on opposite sides of the country, they began to have different ideas about what direction Facebook was headed. As Facebook continued to grow, friendship mattered less and money mattered more.

In California, Zuckerberg decided Saverin was no longer a useful part of the operation and called him to a "business meeting" where Saverin was met with lawyers as soon as he walked through the doors of Facebook's new office, and signed away all of his stock shares of Facebook.

"The Accidental Billionaires" is a great look into the beginnings and interworkings of the biggest social networking site in the world, but should not be relied on for factual information. It is written like a novel, and although Saverin was extensively interviewed for the book, Zuckerberg refused to be.

### the invention of lying

Whether you're a politician, an advertiser or just an everyday person, the burden of lying is not a problem. You speak the truth in this alternate reality. But when Mark (Ricky Gervais) develops the ability to lie, he realizes its rewards and begins to work his way to fame and fortune. The only thing he can't lie his way into is the heart of the woman he loves.

### capitalism: a love story

After tackling the controversial films "Bowling for Columbine," "Fahrenheit 9/11" and "Sicko," documentarian Michael Moore takes his curiosity to a new level: to address the cause of the financial crisis that stopped the world in 2008 and criticizing the government bailout of privately-held businesses.
